

MARINE GUARD

PROTECTIVE COATINGS

EPIGARD MARINE FINISH Data Sheet No. SPL/PMG/MAR2020001

A high performance, two-component Amine adduct cured epoxy glossy enamel specially formulated by using selected weather and chemical resistant pigments. It forms the finish coat in heavy duty coating systems for metal and masonry surfaces for exterior and interior. The coating remains unaffected by many corrosive chemicals and solvents and renders durable finish in industrial and marine atmosphere. The product acts as a tough abrasion resistant barrier coat with excellent resistance to moisture. It is widely used with a suitable primer and intermediate painting system suitable for decks topside Ballast tanks.

Color	Selected Range			
Finish	Glossy			
Flash Point	Above 20°C			
Mixing Ratio (By Volume)	Base : Accelerator 9 : 1			
Volume Solids	55 ± 3%			
Recommended dry film thickness	40-50 microns			
Corresponding wet film thickness	73-91 microns			
Theoretical Spreading Rate	13.75 -11.00 Sq.m/ltr			
Drying time	Surface dry 2 - 4 hours Handleable 8 hours Full cure 7 days			
Interval before Over- coating	Minimum – 18 hours Maximum – 7 days For optimum inter coat adhesion overcoat within 48 hours			
VOC	374 gm/ltr (EPA Method 24)			
Storage Life	Up to 12 months so long as the material is stored in sealed containers under standard warehouse storage condition			
Dry Heat Resistance	Up to 150°C (Intermittent)			

Used as Top coat for the decks,topside,bottom side,super structure of the fishing boats.

Uses

Surface Preparation

Steel Surface

Surface must be clean, dry & free from contamination. Prior to paint application, all surfaces should be assessed and treated in accordance with ISO 8504:2000.

Abrasive blast clean to SA 2½ is recommended.

For Damage area rectification and hand tool and power tool cleaning contact the Technical team of Shalimar Paints Limited

Application Details

Method of Application Brush / Roller / Spray

Notes on Airless Spray

Tip Range Total Output Fluid Pressure Pot Life Thinner 15 – 21 thou. 3000 psi. (210 kg/sq.cm.) 6 - 8 hours Thinner 6756

Limitations

The finish tends to chalk when exposed to sunlight although protective properties of the film remain practically unaffected.

Chemical Resistance Guide (with suitable top coat)

EXPOSURE	Acids	Alkalis	Solvents	Salt	Water
SPLASH & SPILLAGE	Good	Good	Excellent	Excellent	Excellent
FUMES & OUTDOOR EXPOSURE	Good	Good	Excellent	Excellent	Excellent

Health & Safety

Please refer to the separate data sheet available with detailed information.

Precaution

Provide adequate ventilation during application and drying. For proper curing of film, ambient temperature should not be lower than 10°C.

Standard Pack Size

10 & 20 litres - For available pack size contact local representative of Shalimar Paints Limited

NOTES:

- 1. This Product datasheet supersedes all previous datasheet and subject to change without prior notice
- 2. Do not apply when surface temperature is less than 3 $^{\circ}$ than dew point.
- 3. Mixing with mechanical agitator is strongly recommended
- 4. Use material within stipulated pot life
- 5. Do not apply paints when environment temperature rises above 50 % or when relative humidity rises above 85%. Do not apply during rain, fog or mist.
- 6. Use of thinners other than supplied or approved by Shalimar may adversely affect product performance
- 7. Drying is dependent on temperature, relative humidity and thickness; ranges is given for considering those parameters
- 8. System Guide is a typical and for indicative purpose only, however this can have wide range of combination. For details, please contact Shalimar Paints limited
- 9. Request for details information of surface preparation, paint application on the recommended coating system
