Project Work:

Title: Evaluation of Corrosion Inhibitors in Coating:

This project involves working of corrosion inhibitors, which factors should be considered while selection of corrosion inhibitors, also comparison of two corrosion inhibitors. Further research should also be focused on correlation between the structure and observed corrosion inhibition. This understanding will help us to tailor the inhibitor structure to obtain required corrosion inhibition properties. And some std testing method.

Seminar: Self polishing Coating:

Basically, we discuss what is self -polishing coating and its requirement. Which raw material involves in SPC and what type of copolymer are used. Then introduction of TBT base self-polishing coating, its mechanism. What are drawback of TBT based self- polishing coating and detail discussion on alternative to TBT based self-polishing coating. Then alternative technology to self-polishing coating
