PACK SIZES

20kg

30kg

APPLICATION PROCESS

- Ensure that the surface is free from dirt, loose particles etc.
- Mix waterproof putty with portable water slowly.
- Ensure that proper(homogenous) paste is formed.
- This homogenous paste is ready for application.
- This paste should not be kept more than 3 hours or else it will become hard.
- Please make fresh paste every time as per requirement.
- Pre wetting surface with water is recommended before application.
- Level the surface with homogeneous paste and allow it to dry for 4-6 hours.
- Apply additional coat of putty as per surface condition and surface smoothness requirement.

PRECAUTIONS

- Do not apply when the ambient temperature is less than 10°C or if the temperature might drop to this level within 4 hrs of application.
- Ensure homogeneity of the paste

SAFETY FEATURES

- Store it in a cool, dry place
- Keep out of reach of children and away from eatables.
- May be harmful if swallowed. In case of ingestion seek immediate medical attention.
- Wear eye protection during application. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- In case of skin contact, immediately wash skin with soap and plenty of water. Get medical attention if irritation develops or persists.
- In the event of spills, contain spillage using sand or earth.
- No added Lead, Mercury or Chromium compounds.
